If you break any obligations set out in the Guide and this affects the consequences of an insured event, or it prevents us to obtain evidence on the occurrence of the loss, we shall be entitled to compensation of paid benefits in the amount proportional to the gravity of the breach.

Violation of rules may cause misunderstanding. Please pay attention to situations when we are entitled to reduce, reject or refuse payment.

Claims assessment and handling

After your report the claim, we start to research the circumstances under which it occurred and to confirm the existence and value of the insured/damaged items at the time of occurrence of the damage.

In case a survey of the damage is not necessary, we rely on the information you supplied.

We will inform you about the amount of claim payment.

Claims compensation

If the damage occurred on the insured building, auxiliary structure or insured items, we shall reimburse the insured.

In case you caused damage to another person, we pay compensation of loss on your behalf directly to the damaged party.

Compensation of damage

In case you submit for the purpose of claim handling documents in another currency, we will apply the official conversion rate of National Bank of Slovakia for the conversion valid on the day of claim occurrence. In case of third-party liability insurance, we can pay compensation also in foreign currency.

If we reduced your claim payment by the salvage value of damaged items, the residues remain your property.

If the items, building, auxiliary structure are insured simultaneously by other insurers, we will provide only aliquot

payment corresponding to the ratio of the amount we would pay pursuant our insurance contract to the total amount of payment for all insurers. We will pay the insured expenses also by applying the aliquot.

In case of an insured event caused by short-circuit, we shall pay adequate costs of:

We shall reduce the resulting payment by the deductible (if it has been agreed in the insurance contract), outstanding premium, recourse claims and we shall set off all our mutual receivables.

Deductible is not applicable to third-party liability, glass breakage, insured costs and assistance.

If you are not the insured, the above provisions apply in the same way to the insured.

The following coverage limits of apply to selected objects of insurance (limits specified as % share are calculated from the sum insured according the insurance contract):

If you do not comply with theft prevention measures specified in this Guide, we are entitled to pay up to the amount for which the protection was sufficient.

We pay compensation for one insured event up to the maximum amount of limit for the respective risk. Decisive for the determination of the limit is the risk that caused the insured event.

The maximum amount we pay for all insured events within one insurance year is the sum insured for household insurance stipulated in the insurance contract, exclusive of payment for removal costs. We will pay removal costs in excess of the sum insured for household.

Building insurance

We will calculate the amount of indemnity paid for one insured event as the sum of adequate cost of repair or procurement of the insured building, auxiliary structure or item, reduced by the value of residues.

We will pay the new replacement value. We are entitled to pay in time value if, within 3 years after the

destruction of the building or auxiliary structure, you submit no proof that you procured a replacement of the insured property.

The following limits of coverage apply to the insured building, auxiliary structures or items (limits set out as % share are calculated from the sum insured stipulated in the insurance contract):

OBJECT OF INSURANCE	LIMITS OF COMPENSATION	
	INHABITED BUILDING	OTHER THAN INHABITED BUILDING
BUILDING	100 %	100 %
AUXILIARY STRUCTURES	20 %	20 %
THEFT OF BUILDING ELEMENTS - FROM OUTSIDE OF THE BUILDING/AUXILIARY STRUCTURE - FROM BUILDING/AUXILIARY STRUCTURE UNDER CONSTRUCTION	3 %	2 %
CONSTRUCTION MATERIAL, CONSTRUCTION MACHINERY AND TOOLS, FUEL STOCK – WITH THE EXCEPTION OF THEFT	30 %	30 %
CONSTRUCTION MATERIAL, CONSTRUCTION MACHINERY AND TOOLS, FUEL STOCK – THEFT	2 %, max. 6 000 EUR	1 %, max. 2 000 EUR

In case of a flat or non-residential premises, adequate cost of repair of communal parts and equipment of the house shall be determined as:

- 100 % of the cost in respect of communal parts belonging exclusively to the flat/non-residential premises (e.g. outer wall, roof on an attic flat etc.),
- For other communal parts and equipment as the amount

corresponding to the co-ownership share.

If you do not comply with the theft-prevention measures set out in this Guide, we are entitled to reject payment.

If the sum insured for the insured building stipulated in the insurance contract is lower than the new

replacement value at the time of occurrence of the insured event, it is a case of under-insurance. In such case, we will pay compensation in the amount corresponding to the multiple of payment without application of underinsurance and the ratio of sum insured to new replacement value of the building at the time of the insured event; we will reduce also limits of coverage set out in this Guide applying the same proportion.

We pay compensation for one insured event up to the maximum amount of limit for the respective risk. Decisive for the determination of the limit is the risk that caused the insured event.

The maximum amount we pay for all insured events within one insurance year is the sum insured for building insurance stipulated in the insurance contract, exclusive of payment for removal costs. We will pay removal costs in excess of the sum insured for the building.

Third-party liability

If the sum of claimed compensation of several damaged parties is higher than the sum insured, we will pay to each of them only a proportional share, calculated as the ratio of the sum insured to the sum of claims of all damaged parties.

If we undertake in advance in writing to do so, we will also reimburse the cost of legal representation in proceedings

regarding compensation of bodily injury/material damage in connection with the claim against you, for which you are liable and which is covered by this insurance.

The maximum amount we pay for all insured events within one insurance year is the agreed limit of claim payment.

2.5 THE MOST IMPORTANT INFORMATION ABOUT YOUR INSURANCE

In this section we will inform you how we can unilaterally change the provisions of the Guide, about payment of premiums, how we can unilaterally change the amount of premium, validity of the insurance contract and what can trigger its termination.

Changes in an insurance contract that, pursuant legal regulations or this Guide, cannot be made unilaterally, are made with the agreement of both contracting parties. You can express your consent with the proposed changes in the insurance contract by payment of premium.

The change becomes effective on the day following the day of conclusion of such agreement, if later date has not been agreed.

We are entitled to unilaterally change the wording of the Benefit Guide which governs the insurance contract by notifying you, latest 10 weeks before the end of an insurance period, about the new wording of the Benefit Guide which will apply to your insurance contract from the next insurance period.

If you do not agree with the new wording of the Guide, you are entitled to terminate the contract by a written notice given at least 6 weeks before the end of the insurance period in which the new Benefit Guide wording has been announced. The insurance contract shall terminate upon the expiration of the insurance period in which the new Benefit Guide wording has been announced.

A deviation from the provisions of the Guide may be agreed in the insurance contract which becomes effective upon our written agreement.

We deem the premium to have been paid if you paid it:

- Notice of termination due to a change in the amount of premium for the next period of insurance in

connection with a change of circumstances decisive for its calculation; you can submit such notice of termination only until the end of the insurance period in which we notified you about the change of premium,

We may apply the right of annulment of the insurance contract within three months from the day we learned about such circumstance; we are entitled to compensation of costs we incurred by the conclusion of the insurance contract,

3. USEFUL TIPS

In this section, you will find our tips how to better protect your property against possible loss.

GENERAL TIPS ON HOW TO PROTECT YOUR PROPERTY

Regularly check the condition of your family house or flat.

Before leaving for a holiday, disconnect electrical appliances from power supply.

Regularly carry out all inspections prescribed by legal regulations or recommended by appliance manufacturer.

Consider removing dangerous branches or tall trees located near your house.

TIPS REGARDING THEFT

Lock all entrance doors when leaving.

Check if all windows, balcony, loggia or terrace doors are safely shut, the entrance door locked and security system (reacting to movement, sound or temperature change etc.) activated.

Put away any ladders or portable stairs.

Use security systems and regularly check their functionality. Whether you prefer simple or more sophisticated solutions, there is always a suitable combination of security measures (wireless camera, motion, leaked water or smoke detectors etc.) allowing to monitor the system by mobile applications.

Store valuables and cash in a safe-box. Do not leave a large amount of money at home.

In case of any suspicion of burglary or attempted burglary, call the police.

If you lost your keys, immediately replace the entrance door lock.

If you are preparing to leave for a holiday, ask your relatives to collect your mail and check the household once in a week.

Leave your telephone number with a reliable person who can contact you if anything unusual happens during your absence.

TIPS REGARDING WINDSTORM, FLOOD AND RAIN

Pay attention to Meteo warnings about imminent hail, windstorm or gale. Our clients who have property insurance and the respective information is relevant for them, receive the warnings in the form of text messages.

The best prevention of damage by windstorm is to keep the roof in good technical condition.

In case of imminent storm, carefully shut the windows and doors (and also roof-lights or ventilation, if any), unplug all electric appliances or disconnect circuit-breakers. Overvoltage protection helps to protect your electronic and electric devices against damage by lightning.

If there is increased risk of flood, prepare yourself in advance, watch the news and get information about the way and place of evacuation.

In a family house:

- Disconnect water, gas and power supply,
- Put out any open fire and move your property to upper floors,
- Seal sewage and waste outlets in ground floor and cellar,
- Prepare tools and equipment for security measures (bags with sand, pump etc.),
- Remove or secure objects that can be easily moved by water-flow around the house and do not leave dangerous or chemical substances accessible to water.

For the future, consider carrying out additional structural adjustments (e.g. insulation, backvalves in pipes).

TIPS REGARDING FIRE

Although fire is not among the most frequent causes of insured events, spreading flames cause greater damage than any natural element.

Whether you live in an flat or family house, comply with standard rules of a clean and safe home, instructions for the operation of electrical appliances and do not interfere with them unprofessionally.

In a family house:

- Buy a fire extinguisher and install a smoke/fire alarm which will notify you in time about the occurrence of a fire and spreading of smoke,
- When installing heating equipment (e.g. cooking range, stove), pay attention to the use a fire-resistant mat with prescribed dimensions, their professional attachment to chimneys and do not store in their vicinity any flammable materials.

In communal premises of a block of flats:

- Keep order, respect no-smoking and no-open-fire rules, be cautious when handling flammable materials etc.,
- Remove bicycles, prams and other objects from corridors and keep emergency exit routes free,
- Do not lock entrance door, it is against the law and dangerous,
- Get acquainted with the evacuation plan, plotted emergency exit routes, meeting sites in open space and location of fire extinguishers.

TIPS REGARDING EARTHQUAKE

Even in Slovakia, earthquakes occurred in the past, causing severe material damage as well as casualties.

As we cannot exclude its occurrence in the future, we recommend, in case of earthquake, to leave the building using stairs within 10 – 20 seconds and remain in open space away from the building, falling glass, walls, lamps and masts.

If you cannot leave the building in time:

- During tremors keep near outer and supporting walls,
- Make sure that there are no objects near you that could fall down (cupboards, shelves, lamps etc.),
- Lay down on the floor (e.g. near a sofa, bed), huddle up and protect your head with hands; hide under a table only if there is no better alternative.

If you have already a no-loss bonus, and compensation is paid for the insured event, then yes.

ABOUT COVERAGE

How do I determine the sum insured for a building?

The sum insured of the building should correspond to its new replacement value. We shall help you with the determination of the value of the building using our evaluation tables. If the value of building determined by us is too low, you can increase it.

I own a flat and have third-party liability insurance. Does this insurance apply also to damage caused by a tenant of the flat?

The tenant must have his/her own liability insurance.

Can I insure my dog?

Pets are covered against all risks agreed in the household insurance. However, disease or injury that do not occur in connection with the insured risks are not covered.

ABOUT CHANGES IN THE INSURANCE CONTRACT

Do I have to update the list of insured items when I acquire new property?

No, you do not have to report each item. However, consider increasing the sum insured in case the value of property in your household increases. If a list of valuables has been attached to the insurance contract, you have to update it.

Is it necessary to make changes in the insurance contract in writing?

Some changes can be made by e-mail or telephone. You will find their list at allianz.sk. We will confirm the changes you have made in writing. If you have signed and activated an Electronic Communication Agreement, after signing into your Allianz Account (Môj Allianz), you can administrate your data also using the internet site: https://account.allianz.sk/apps/manazment_uctu.

What happens to my insurance if I move?

If you move to another place in the SR and you inform us in writing about the date when you start, your property shall be insured for 60 days from the beginning of moving at both places of insurance. After you have moved, the insurance continues at the new address.

Can the insurance terminate also due to a change of ownership of the building? What documents should I submit?

Insurance can terminate also by transfer of ownership of the object of insurance to another person (e.g. sale of a building). It is necessary to submit a Decision from the Cadaster Authority that the ownership has been registered with the Cadaster Authority.
